

FLUID HEADS FLAT BASE

# MASTER 65 ✓

## DESCRIPTION

The Master 65 fluid head is the ideal Outdoor Broadcast solution for bulky boxed lenses, designed to support camera weights from 20 Kg (44 lbs) to 65 Kg (143 lbs)

Depending on CoG position, the maximum payload is:- At 200 mm: 65 kg- At 175 mm: 70 kg- At 150 mm: 80 kg It combines a wide range of counterbalance capabilities, performing perfect balance at any tilt angle with a new Cartoni fluid drag system based on silicon film.

The new drag ensures almost freewheeling at its minimum up to consistent drag for smooth and slow movements with long focal lengths. This rugged Head comes with a large sliding platform and interfaces with the standard dovetail camera plate (to be ordered as an accessory)

The micrometric movements of the slide are operated by a handy crank placed under the slide.

All settings are ergonomic and placed in the right positions. Pan Bars are compatible with the Vinten attachment.

The Master 65 comes equipped with a digital readout for counterbalance reference and illuminated spirit bubble.

The Master 65 flat base interfaces with Mitchel mount tripods, Pedestals and other supports via 4 bolts fixing system, 2 3/4" castle-nut or a 3/8" threaded central knob.

Optional 150mm bowl base adapter  
Optional Pedestal adapter

COMMERCIAL CODE: HM6500

## TECHNICAL DATA

Minimum Payload Capacity	20 kg / 44 lbs
Maximum Payload Capacity	80 kg / 176 lbs
Weight	16 kg / 35 lbs
Bowl Diameter	Flat
Fluid Drag	Continuous
Counterbalance	Continuous
Pan Range	360°
Tilt Range	+/-65°
Temperature Range	-40°/+60°
Payload Capacity (150 mm)	80 kg
Payload Capacity (200 mm)	65 kg
