Wide shoulder pad for USBP-15 MKII. The shoulder pad can be placed without using any tools.
0350-2315

The Vocas sliding system is a revolutionary new way to mount cameras to different setups, while balancing the camera optimally.

At the heart of this new system is the universal camera adapter plate (0350-2220). This plate can be attached underneath any camera and gives the camera a dovetail connection. The dovetail connection allows the camera to slide on or off the various new Vocas products that are based on this dovetail system, such as the USBP-15 MKII (0350-2200), the BP-19 MKII (0480-0019) and the Quick release dovetail plate (0350-2220).

The benefits of the Vocas Sliding System:

- Easily find the optimal balance point of your camera without any tools.
- Easily switch your camera between 15 mm setups, a drone, a gimbal or any other conceivable setup that incorporates the Quick release dovetail plate (0350-2220)
